

Skeleton Hallway

Last Updated Wednesday, 15 January 2014 13:50

Parts:

- Lots of rubber skeletons
- Bead board foam
- Cheese cloth
- Various colors of spray paint
- Ground coat adhesive
- Pulleys
- Heavy fishing line
- Air valves
- Cylinders
- Stapler
- Screws

Description:

This effect is great because it plays off of many fears; Fear of the dark, fear of tight places, and fear of the dead. When the group enters the hall it appears to be just a dark passageway with some sort of rocky surface if they reach out and touch it. Then suddenly a strobe light flicks on, and the room comes alive with moving skeletons!
